

Application Note

Marine Connections

The Model 6000 Subscriber Terminal by L-3 Communications is a GSM/GPRS compatible subscriber terminal providing fixed wireless access for customers using standard GSM/GPRS mobile cellular networks. Suitable for a multitude of applications, the subscriber terminal allows the wireless service provider to maximize network utilization, minimize installation and maintenance times and increase subscriber penetration and revenues by supporting a full range of communications needs.

Model 6000 Subscriber Terminal

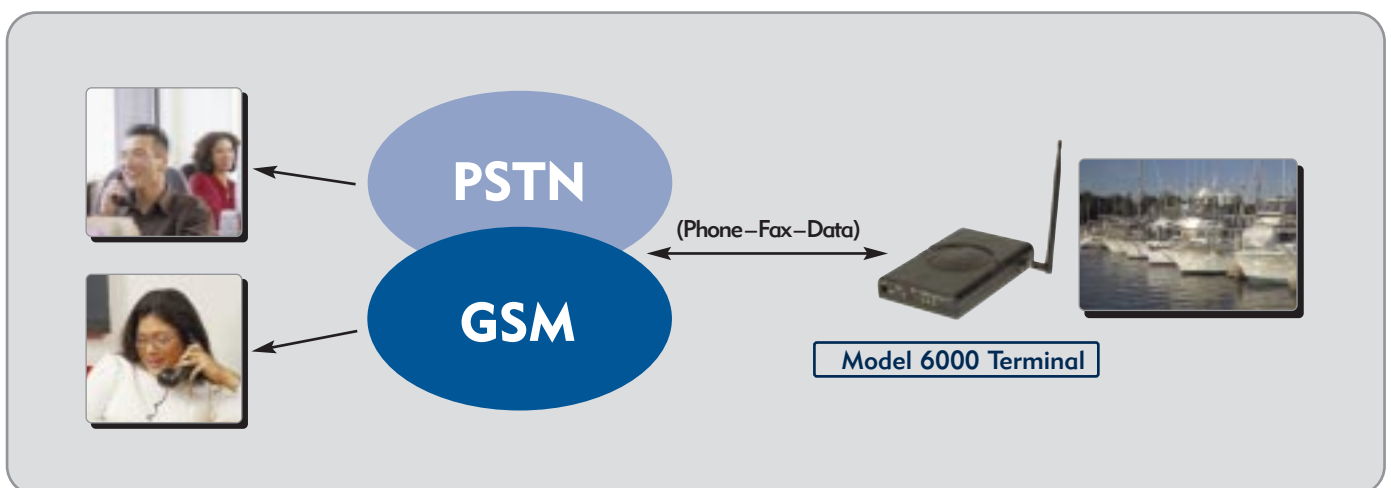

Marine Connections

The Model 6000 subscriber terminal allows boat owners to keep in touch with family, colleagues and customers while enjoying the open waters. With a Model 6000 installed on board, an ordinary telephone, a fax machine and computer can simply be plugged in, creating a mobile office environment that is transparent to the person on the receiving end - whether it is family, colleagues or customers.

The easily installed Model 6000 brings simplicity back into the complicated and often frustrating world of communications. The terminal connects to any standard GSM network and allows the use of standard home/office hardware instead of expensive and complicated mobile phones for voice, fax and data communication.

The Model 6000 is battery-powered and can also be plugged into the boat's electrical system. A power inverter may be used to operate ancillary systems such as a PC or laptops from the boat's DC supply. The power inverter converts 12v/24v battery power to 240v household power and can also support other electrical appliances.

The Model 6000 is an ideal solution for those times when you need your office to be wherever your life takes you - the Model 6000 gives you the freedom to stay in touch.
