

Application Note

Temporary Site Connection

The Model 6000 Subscriber Terminal by L-3 Communications is a GSM compatible subscriber terminal providing fixed wireless access for customers using standard GSM mobile cellular networks. Suitable for a multitude of applications, the subscriber terminal allows the GSM service provider to maximize network utilization, minimize installation and maintenance times and increase subscriber penetration and revenues by supporting a full range of communications needs.

Model 6000 Subscriber Terminal

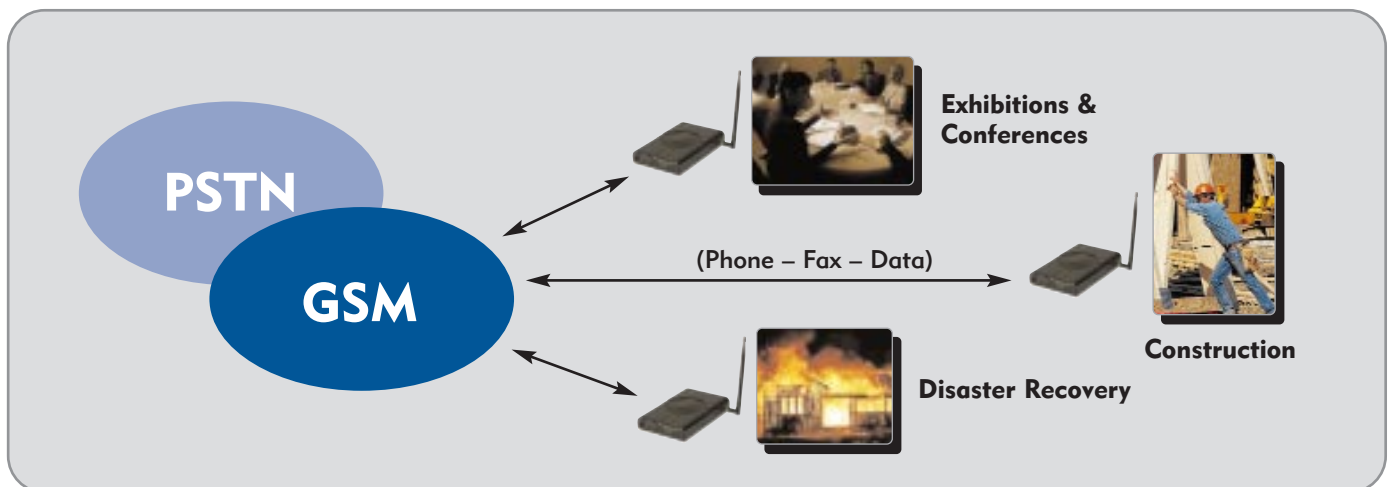

Temporary Site Connections

Wireless networks have become increasingly popular avenues for the provision of traditional voice traffic. The flexibility of the Model 6000 subscriber terminal provides a wireless solution for utilities and business users requiring fixed line services for a mobile office or temporary location using a standard GSM network connection.

The services offered by the Model 6000 are ideal for disaster recovery, exhibitions, construction, emergency services and other temporary or seasonal uses.

Model 6000 terminals accommodate fixed line telephones and fax and also provide a data connection to a computer through the GSM network. The Model 6000 is easily installed by the subscriber in their home or office without the use of complicated tools.

The service provider can be ensured that business users can improve and expand their communications with a cost-effective and versatile solution. The Model 6000 offers service providers a competitive edge in meeting their key customers' ever-changing requirements.
